FlexiFix

Do you find yourself wanting to...

- ▶ Reduce the impact of interest rate fluctuations,
- ▶ Safeguard against inflation,
- ▶ Budget better for vehicle finance,
- ▶ Have fixed vehicle repayments?

If you answer yes to any of the above then FlexiFix is your finance solution.

In a move to manage rising expenses and stretch budgets, customers often choose to use fixed rate financing as a means to curb against anticipated interests rate hikes. Although fixed rate financing guarantees fixed monthly repayments, this can prove to be expensive should interest rates decrease (as the fixed interest rate remains unchanged). The benefit that comes with interest rate decreases does not apply to fixed rate contracts.

FlexiFix assists in minimising the immediate impact of interest rates increases, whilst the benefit of rate decreases will still be enjoyed when they occur.

FlexiFix enables you to budget better by allowing you to have fixed payments till the penultimate payment. The last payment absorbs all increases, or decreases that may occur with interest rates.

What are the customer benefits?

- ▶ Fixed capped monthly installments (till penultimate installment)
- ▶ Less worry about immediate impact of interest rate increases, therefore better budgeting
- ▶ Provides certainty and payment guarantee to customers
- ▶ Should the customer wish to re-finance the last payment, Mercedes-Benz Financial Services can assist by refinancing this amount on a new agreement for an agreed term **
- ▶ Unlike fixed rate contracts, FlexiFix enables the customer to benefit from interest rate decreases. Here, an automatic decrease in the last payment would occur. Once again, the fixed monthly repayments would be unaffected
